Subject: Risk Management at Portland Harbor

EPA's primary comments on the draft human health and ecological risk assessments addressed the LWG's elimination of certain lines of evidence and the failure to develop PRGs for all COCs for use in the draft FS. In our comments on the FS evaluation process, we suggested that the we may be able to make risk management decisions during the AOPC to SMA conversion.

During last Wednesday's Portland Harbor management meeting, we decided that it would be useful to have a meeting to discuss this topic. This meeting is currently scheduled for Tuesday, February 2nd - time TBD. We have pegged our risk assessors to attend this meeting but will probably need some FS support as well. In addition, it would also be useful to have an FS team meeting to discuss this point prior to meeting with the LWG.

At this time, I would like to propose Monday, February 1st for a meeting of the FS team. I would also like to identify members of the FS team that should attend the risk management meeting with the LWG. Please let me know if you are available on February 2nd for this discussion. Attendees may participate by phone.

Thanks, Eric
